

Customer-made
Precision Broaching

Broach

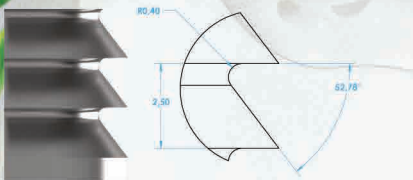

- Modified according to the coupling of the broach handle
- Precisely grinded to the section of the corresponding implant
- Variable pitch of cutting teeth

fine art

Next Generation Orthopaedic Instruments

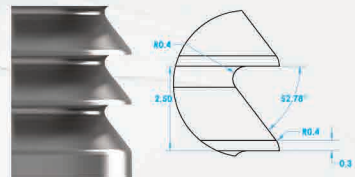

SAYAN[®]
ORTHOPAEDICS

excellence

Commonly machined sharp edges :

- Less durability
- Smaller bone cavity as used
- Easy to get damaged therefore shorter life time

SAYAN double cutting angle :

- More durable with R0.4 mm on the cutting tip
- Better bone engraving with double cutting angle
- Longer life time
