MIS-Flex Acetabular Reamer Handle

- 1** Modified according to coupling of the reamer
- 2** Hinge to adjust the handle for left-hand and right-hand usage of the motor, sweeping 86° in total
- 3** Ergonomic handle to hold and drive the instrument
- 4** Quick coupling adaptor for various motor types
- 5** Provides 10° extra angular freedom to drive the instrument, enabling the handle sweep 106° in total from right to left
- 6** Protective cover to avoid rotating shaft pinning gloves
- 7** Alternative handle to hold and drive the instrument in case of free-hand use by disassembling the ergonomic handle at the back. During free-hand use, the motor driven shaft has a freedom of motion upto 81° vertically and 67° horizontally on one side
