

Acetabular Reamer

- Dome-like hemispherical shape that perfectly fits into the acetabular cavity
- Hardened under vacuum up to 52 ± 2 Hrc
- Sizes available from \varnothing 38 mm to \varnothing 76 mm in 1 mm increments
- Varying teeth number from 28 to 111 depending on size of the reamer dome
- 23° cutting angle maintaining brand-new cutting performance of the teeth through life time
- 1 mm cutting teeth height
- Cutting teeth machined in 5 - axis CNC machine
- Encapsulation of bone chips
- Minimal heat generation with ideal cutting features
- Available in multi handle couplings
